³ Gold produced and gold sold in Q1 includes a contribution from Hermes prior to commercial production being declared.

Chris Bradbrook, President and CEO of Superior Gold stated: “We were pleased to see the marked improvement in operating performance throughout second quarter compared to the first quarter, particularly in May and June as stope grade increased with associated cost improvements. The impressive recoveries of 90% were achieved without the Gravity Circuit, which was commissioned in July, and we believe will help increase the recoveries further. The second quarter production was a record for the Company and we

anticipate continued improvement in grade, costs, and production levels during the second half of the year as we continue to target our 2018 guidance of 100,000 – 110,000 ounces of gold.”

The Company will be releasing complete financial and operating results for the second quarter and first six months of 2018 before market open on August 21, 2018.
